

About me

Hi, I'm Che-Cheng. I'm originally from Taiwan but moved to Ottawa one year ago. I was first exposed to UX design while browsing the Apple Pro (2nd generation) website, which stimulated me to learn about human behaviour.

During my academic education and experience, I have developed skills in design tools such as Figma and Illustrator, strong communication skills, and web design.

Currently, I'm studying at Algonquin College of Interactive Media Design and learning more about UX/UI design.

When I'm not working.

I enjoy spending my leisure time exploring Canada, exercising, and taking photos. When the summer comes, I would go fishing and enjoy the vibe.
